

#### RULES "Quartett"

The cards are shuffled and dealt out. Each player holds his deck of cards so that only he can see the topmost card. The player sitting to the left of the dealer starts the game by choosing a technical fact on the top card (for example horsepower) and reading it out. The other players read out the HP figure on their topmost card one after another. The player with the highest score receives the other players' cards and puts them behind his deck. Now the respective winner takes his turn by reading out a technical fact of his choice (for example capacity). Winner is the player, that has taken most of the tricks.
